B-D YALE LUER-LOK® CONTROL

The large, comfortable metal thumb and finger rings give a firm and secure grip and allow easy filling and emptying of the syringe with one hand. Barrel and plunger are made of special formula resistance glass. This syringe has the regular Luer-Lok feature.

No.	*Capacity*	*Graduations*
3YLC	3 cc.	in 1/5 cc.
5YLC	5 cc.	in 1/5 cc.
10YLC	10 cc.	in 1/5 cc.

B-D SANA-LOK® CONTROL

The barrel is made of special formula resistance glass to withstand erosion usually caused by sterilization or medication. The plunger is made of rust-resisting metal. Both barrel and plunger are highly polished and friction is reduced to a minimum, thereby providing an unusually tight and lasting fit. The large, comfortable metal thumb and finger rings give a firm and secure grip and allow easy filling and emptying of the syringe with one hand.

No.	*Capacity*	*Graduations*
3SLC	3 cc.	in 1/5 cc.
5SLC	5 cc.	in 1/5 cc.
10SLC	10 cc.	in 1/5 cc.

B-D SANA-LOK® PITKIN

This self-filling syringe permits continuous injections of large amounts of solution. The flow is controlled by a valve on the side of the piston stem. The syringe may be used for a single injection by unscrewing the side outlet and screwing on a cap.

No.	
P5SLI	Sana-Lok Improved Pitkin Syringe, 5 cc. capacity. (A spring return on the plunger permits operating without fatiguing the thumb).
P3SLC	Sana-Lok Pitkin Syringe, without spring, 3 cc. capacity
P5SLC	Sana-Lok Pitkin Syringe, without spring, 5 cc. capacity

CORNWALL SYRINGE

Has a special Luer-Lok syringe barrel, 2 cc. graduated in 1/10 cc. and minims and a fitted glass plunger with an automatic spring return. Large, comfortable, metal finger rings and metal thumb rest allow easy filling and emptying of the syringe with one hand. A screw attachment with lock nut sets the syringe for quick and automatic measuring of repeat doses.

No.	
1250	Outfit includes Cornwall Syringe and No. 1250NR Cannula.
1251	Pipetting Outfit for continuous flow includes No. 1250 Outfit, No. 470V Automatic Valve, No. 330S Sinker 20" of No. 470T Tubing.
1252	Same as No. 1251 but with No. 423FA Swinny Filter Adapter.
1253	Glass Syringe assembled with Metal Holder.
1250NR	Stainless steel Cannula 14G 4" length.
1250S	Glass Syringe only.

BUSHER® AUTOMATIC INJECTOR

The Busher Automatic Injector provides for comparatively painless automatic insertion of the needle at proper depth and angle. Insulin users and others on prescribed self-injection welcome it. The Busher is simple in construction and in operation. It may be used with any B-D short type Insulin Syringe or with No. 1YV Vaccine Syringe which is ideal for injection of epinephrine. It cannot be used with a long type syringe.

No.	
40	Busher Automatic Injector only.
41	Busher Automatic Injector with No. 1YI-40-80 Insulin Syringe.

*Can be used with the Busher Automatic Injector.
